

Family Activity - God is Faithful

Gather a few small items together, eg. a coin, cotton balls, paper clips, pen, eraser, and small stuffed animal. and take them into your garden to do the following experiment:

Hold up each object up as high as possible and let go. Try doing it in different ways – throw it up first, or throw is sideways. If you change the way you drop them does anything change in how they land?

If you are willing for me to display your child doing this experiment in the service online, please send me a photo

You will notice that no matter how you drop them, they always land on the floor. It's impossible for them to land on the ceiling or on the wall. Why? Because gravity pulls objects down. Gravity is totally dependable--it pulls things down. Another way to put it is to say that "gravity is always faithful to pull things down."

You might also see that the leaves fall on the floor.

Think about other things in nature which are totally dependable: Leaves fall on the floor in Autumn; birds make nests; ants gather food; waves crash on the beach; the stars come out at night; the sun shines even when there are clouds.

Talk about what you saw and why it is a reminder of faithfulness. God is completely faithful in every way. We can depend on Him to always do what He says He'll do. The world He created reflects God's faithfulness in many ways, and it reminds of His faithfulness wherever we go.

Choose one thing you saw today to be your reminder of God's faithfulness to you and share it with everyone.

God never forgets a promise He has made.
